

## PERRY ROBINS, M.D.

PERRY ROBINS, M.D. is Professor Emeritus of Dermatology at New York University Medical Center. He practiced medicine for over thirty-five years and has treated more than 47,000 skin cancer patients. An accomplished educator in his field, Dr. Robins has trained 60 doctors from around the world who are now leaders in dermatologic and skin cancer care, and has lectured in 34 countries in four languages.

Dr. Robins is the founder and president of The Skin Cancer Foundation, a national and international organization dedicated to skin cancer research and public and medical education. In addition, Dr. Robins is the founder/president of the International Society of Dermatologic Surgery, founder/former president of the American College of Mohs Micrographic Surgery, and former president of the American Society of Dermatologic Surgery.

The American Academy of Dermatology has presented Dr. Robins with honorary membership for outstanding contributions in dermatology, and on behalf of The Skin Cancer Foundation, he has received its Award for Excellence in Education, and the Golden Triangle Award for Excellence in Community Leadership. He has been honored as a distinguished member of both the American College of Mohs Micrographic Surgery, and the American Society of Dermatologic Surgery, and was awarded a Presidential Citation by the International Society of Dermatologic Surgery. The impact of Dr. Robins' work is far-reaching, and over a dozen international dermatologic societies have presented him with honorary memberships.

As a pioneer in Mohs micrographic surgery, Dr. Robins has published over 60 articles in leading medical journals and was the founder and former publisher of the *Journal of Dermatologic Surgery and Oncology*; he is the founder and current medical editor of *The Journal of Drugs in Dermatology*. He has authored three books for the general public: *Sun Sense: a Guide to the Prevention and Early Detection of Skin Cancer*, *Understanding Melanoma: What You Need To Know*, and *Play it Safe in the Sun*, an illustrated book for children. Dr. Robins is known internationally for the advancement of his specialty, his commitment to his patients, and his contributions to education.
